Project Overview

Project Name	Auto-Ticket Classification using Flow Designer
Project Description	A ServiceNow school IT helpdesk solution that creates School IT Ticket records and automatically classifies supported requests using Flow Designer keyword conditions. The solution also sends an acknowledgment email to the Caller.
Project Version	1.0
Testing Period	Not specified

Testing Scope

Features and functionalities tested:

1. School IT Ticket creation using Caller and Short Description.
2. Automatic Category and Subcategory classification.
3. Dependent Category/Subcategory configuration.
4. Email acknowledgment to the Caller.
5. Viewing created ticket records.

User stories / requirements covered: ticket submission, automatic classification, notification, helpdesk ticket processing, configuration, security/change tracking.

Testing Environment

URL / Location	ServiceNow Developer Instance - School IT Tickets application
Credentials	Not included in documentation for security reasons
Application	School IT Support / School IT Tickets

UAT Test Cases

Test Case ID	Test Scenario	Test Steps	Expected Result	Actual Result	Pass/Fail
TC-001	Create a school IT ticket	Open School IT Tickets; create a record; enter Caller and Short Description; submit.	Ticket is created successfully.	School IT Ticket record is created and appears in the ticket list.	Pass
TC-002	Automatic Wi-Fi classification	Enter 'Wi-Fi not working in library' with Category/Subcategory left unselected; submit; review the saved record.	Category becomes Network and Subcategory becomes Wi-Fi.	The ticket displays Network and Wi-Fi.	Pass
TC-003	Projector classification	Create a ticket with a projector-related Short Description; save; review the record.	Category becomes Hardware and Subcategory becomes Projector.	The ticket list shows a projector request classified as Hardware.	Pass
TC-004	Requester notification	Create a ticket with a valid Caller; inspect the email log and preview.	Caller receives an acknowledgment notification.	ServiceNow generated the acknowledgment email and the preview states that the ticket was received and automatically categorized.	Pass
TC-005	Review helpdesk records	Open the School IT Tickets list and inspect created records.	Tickets are available for helpdesk processing.	The list displays multiple School IT Ticket records and their available classification data.	Pass

Bug Tracking

Bug ID	Bug Description	Steps to reproduce	Severity	Status	Additional feedback
BG-001	No confirmed defect recorded from the supplied UAT evidence.	Not applicable.	-	No confirmed bug	Continue with negative-case testing and broader keyword coverage before production use.

UAT Notes

Positive scenarios are supported by the supplied ServiceNow screenshots. Negative scenarios, boundary conditions, and broader keyword coverage should be reviewed before formal production deployment. No credentials are reproduced in the document.

Figure 1: Published workflow used as UAT evidence.

The screenshot shows a ServiceNow form for a "School IT Ticket". The ticket number is "TKT0001012". The caller is "System Administrator". The short description is "Wi-Fi not working in library". The description field is empty. The category is "Network" and the subcategory is "Wi-Fi". The state is "None". There are fields for "Assigned Group" and "Assigned to", both of which are empty. The form has "Update" and "Delete" buttons at the bottom.
