

Project Design Phase-II

Solution Requirements (Functional & Non-functional)

Date	
Team ID	
Project Name	Auto-Ticket Classification using Flow Designer
Maximum Marks	4 Marks

Functional Requirements

The functional requirements define what the solution must do for the student, helpdesk technician, and administrator.

FR No.	Functional Requirement (Epic)	Sub Requirement (Story / Sub-Task)
FR-1	Ticket Submission	Enter Caller; enter Short Description; create the School IT Ticket record.
FR-2	Automatic Classification	Check the Short Description for supported keywords; assign Category; assign Subcategory.
FR-3	Dependent Classification	Make Subcategory dependent on Category and show the relevant choices.
FR-4	Email Notification	Send an acknowledgment email to the Caller after ticket creation.
FR-5	Ticket Processing	Store and display School IT Ticket records for helpdesk processing.
FR-6	Security and Change Tracking	Apply access controls and capture configuration changes in the Project Update Set.

Non-functional Requirements

NFR No.	Non-functional Requirement	Description
NFR-1	Usability	The student should be able to submit a ticket using basic information without needing to understand technical categories.
NFR-2	Security	Access to the custom ticket table should be controlled through ServiceNow ACL and role configuration.
NFR-3	Reliability	Supported keywords should consistently map to the configured Category and Subcategory values.
NFR-4	Performance	Classification should occur automatically after record creation for supported requests.
NFR-5	Availability	The application should be accessible through the ServiceNow School IT Tickets module.
NFR-6	Scalability	The same Flow Designer logic can process repeated School IT Ticket records.

Requirement Evidence

Figure 1: Flow Designer implementation of the automatic classification requirement.

The screenshot shows the "School IT Ticket" form in the ServiceNow interface. The form displays fields for Number (TKT0001012), Caller (System Administrator), Short description (Wi-Fi not working in library), Description, Category (Network), Subcategory (Wi-Fi), State (-- None --), Assigned Group, and Assigned to. The form includes "Update" and "Delete" buttons at the bottom.
