

PROJECT DEVELOPMENT PHASE

GenAI Functional & Performance Testing

Date	
Team ID	
Project Name	Auto-Ticket Classification using Flow Designer
Maximum Marks	4 Marks

Functional and Performance Testing

The testing phase validates ticket creation, automatic keyword classification, and requester email acknowledgment within the ServiceNow environment.

Test ID	Scenario	Expected Result	Actual Result	Status
FT-01	Create School IT Ticket	Record created with Caller and Short Description.	Created records visible in list.	Pass
FT-02	Automatic Wi-Fi Classification	Category = Network, Subcategory = Wi-Fi.	Demonstrated ticket shows Network/Wi-Fi.	Pass
FT-03	Projector / Hardware	Projector request maps to Hardware / Projector.	Ticket list shows classified as Hardware.	Pass
FT-04	Email Acknowledgment	Acknowledgment email generated for Caller.	Email log & preview show acknowledgment.	Pass
PT-01	Response Time Measurement	Execution time is measured and recorded.	No timing measurement supplied.	Not Tested
PT-02	Concurrent API Load	External API remains responsive.	N/A; no external API used.	N/A
PT-03	File Upload Load	Multiple files process without failure.	N/A; file upload not in scope.	N/A

Functional & Performance Testing Validation Lifecycle

Figure 3: School IT Ticket showing Category = Network and Subcategory = Wi-Fi.

Number	Assigned Group	Assigned To	Color	Category	Description	Short description	State	Subgroups
1670355101	jenral	jenral		System Administrator	Hardware	Passive and active directory		
1670355101	jenral	jenral		System Administrator		We do not working in library		
1670355102	jenral	jenral		System Administrator	Network	We do not working in library		

Figure 4: School IT Tickets list showing created records and classification results.

The screenshot shows the ServiceNow Email log interface. At the top, there's a search bar and tabs for 'Emails', 'Created', and 'History'. Below the tabs, there's a table with columns: 'Created', 'Recipients', 'Subject', 'Type', 'Notification type', and 'User ID'. The table contains several rows of email logs, including one for 'Restocking Request For Fujitsu T18 Hybrid Solid State Drive' and another for 'Your Request for the issue has been submitted'.

Created	Recipients	Subject	Type	Notification type	User ID
2024-09-28 01:00:07	allan.muttern@sevenspike.com	Restocking Request For Fujitsu T18 Hybrid Solid State Drive	sent-ready	SMTP	(empty)
2024-09-28 23:24:18	admin@sevenspike.com	Your Request for the issue has been submitted.	sent-ready	SMTP	(empty)
2024-09-28 14:01:11	admin@sevenspike.com	[JTM Analytics] Daily Data Collection completed with error	sent-ready	SMTP	(empty)
2024-09-28 02:00:48	admin@sevenspike.com	[JN VSC] Daily Data Collection completed with error	sent-ready	SMTP	(empty)
2024-09-28 01:00:04	allan.muttern@sevenspike.com	Restocking Request For APC 42U 3100 192 Network Racks	sent-ready	SMTP	(empty)
2024-09-28 00:00:06	admin@sevenspike.com	Daily Job to fetch Email Indicator Data and Email Notifications created completed with error	sent-ready	SMTP	(empty)
2024-09-28 01:00:04	allan.muttern@sevenspike.com	Restocking Request For Dell Inc. PowerEdge R71042 Blade Server	sent-ready	SMTP	(empty)

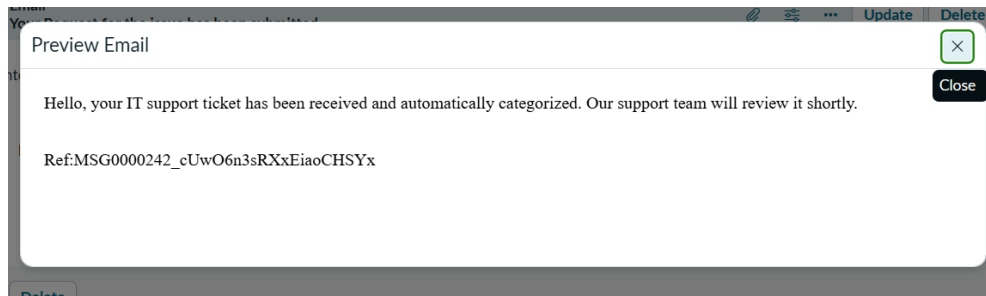

Figure 6: Preview of the acknowledgment email sent after ticket submission.

Testing Note

The functional tests marked Pass are supported by the submitted screenshots and project details. Performance cases requiring measured timing, concurrent-load results, or file-upload behaviour are left as Not Executed or N/A where the implemented project does not contain that feature or the required measurement evidence was not supplied.
