

PROJECT DEVELOPMENT PHASE GenAI Functional & Performance Testing ServiceNow School IT Helpdesk Automation	Date: 28 September 2026 Team ID: NM-2026-IT-042 Project Name: Auto-Ticket Classification using Flow Designer Maximum Marks: 4 Marks
---	---

TESTING OVERVIEW & SCOPE

Testing verified that ticket submission triggers Flow Designer to classify incoming issues according to configured keyword conditions, and that outbound requester email notifications are generated reliably. Benchmarks for unsupported non-functional areas (e.g. concurrent API load, file upload) are noted accurately as Not Tested / N/A.

FUNCTIONAL & PERFORMANCE TEST CASES TABLE

Test ID	Scenario / Feature	Expected Result	Actual Result	Status
FT-01	Create School IT Ticket	Ticket created with Caller and Short Description; state set to New.	Record created successfully and appears in ticket list.	Pass
FT-02	Auto Wi-Fi Classification	Short description with "Wi-Fi" sets Category=Network, Subcategory=Wi-Fi.	Category set to Network, Subcategory set to Wi-Fi.	Pass
FT-03	Auto Projector Classification	Short description with "projector" sets Category=Hardware, Subcategory=Projector.	Category set to Hardware, Subcategory set to Projector.	Pass
FT-04	Email Acknowledgment	System triggers outbound email notification to the Caller.	Email logged in ServiceNow mail queue with preview generated.	Pass
PT-01	Response Time Measurement	Flow execution completes within acceptable SLA limit (< 2s).	Flow completes immediately upon record insert.	Pass
PT-02	Concurrent External API Load	External classification API maintains throughput under load.	N/A; solution uses native platform logic, no external API.	N/A
PT-03	File Upload Concurrency	Attachment streaming processes multi-file payloads.	N/A; file upload is not part of prototype workflow.	N/A
