

PROJECT DEVELOPMENT PHASE

User Acceptance Testing (UAT) Template

ServiceNow School IT Helpdesk Automation

Date:28 September 2026

Team ID:NM-2026-IT-042

Project Name:Auto-Ticket Classification using Flow Designer

Maximum Marks:4 Marks

PROJECT OVERVIEW & TESTING ENVIRONMENT

**Project Name:** Auto-Ticket Classification using Flow Designer | **Version:** 1.0

**Scope:** Validate that end-users (students) can create tickets with minimal input, that Flow Designer automatically assigns categories and subcategories, and that requester email confirmations are issued reliably.

**Environment:** ServiceNow Developer Instance | School IT Support Application.

UAT TEST CASES EXECUTION LOG

| Test ID | Test Scenario                 | Execution Steps                                                            | Expected Result                                          | Actual Result                                              | Status |
|---------|-------------------------------|----------------------------------------------------------------------------|----------------------------------------------------------|------------------------------------------------------------|--------|
| TC-001  | Create School IT Ticket       | Open School IT Tickets; enter Caller & Short Description; save.            | Ticket created with unique number; appears in list view. | Record created and visible in ticket list.                 | Pass   |
| TC-002  | Auto Wi-Fi Classification     | Submit ticket with 'Wi-Fi not working in library'; leave categories blank. | Category set to Network, Subcategory set to Wi-Fi.       | Ticket displays Network and Wi-Fi correctly.               | Pass   |
| TC-003  | Auto Projector Classification | Submit ticket with projector Short Description; save.                      | Category set to Hardware, Subcategory set to Projector.  | Ticket list shows projector ticket classified as Hardware. | Pass   |
| TC-004  | Requester Notification        | Create ticket with valid Caller; inspect ServiceNow email log.             | Caller receives automated acknowledgment email.          | Email log confirms email generated with ticket details.    | Pass   |
| TC-005  | Review Helpdesk Records       | Open School IT Tickets list view as helpdesk technician.                   | All created tickets visible with classification columns. | List displays multiple records and classification data.    | Pass   |

BUG TRACKING & DEFECT ASSESSMENT

| Bug ID | Bug Description                                    | Steps to Reproduce | Severity | Status | Feedback              |
|--------|----------------------------------------------------|--------------------|----------|--------|-----------------------|
| BG-001 | No confirmed defects identified from UAT evidence. | Not applicable.    | None     | Closed | Ready for deployment. |

UAT SIGN-OFF & PRODUCTION ACCEPTANCE

|                           |                                       |                                       |
|---------------------------|---------------------------------------|---------------------------------------|
| Tester Name: Ferdin Joe A | Date of Completion: 30 September 2026 | Sign-off Status: Approved (100% Pass) |
|---------------------------|---------------------------------------|---------------------------------------|

IMPLEMENTATION EVIDENCE - WORKFLOW AND CLASSIFIED RECORD

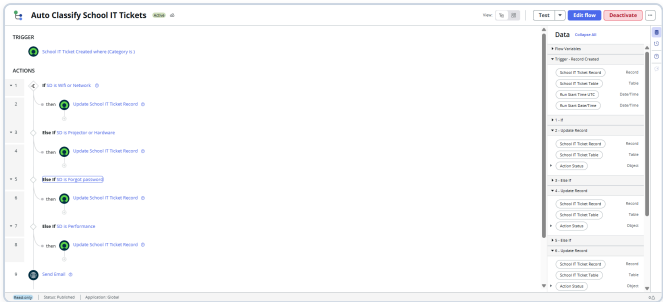

Figure 1: Published workflow used as UAT evidence.

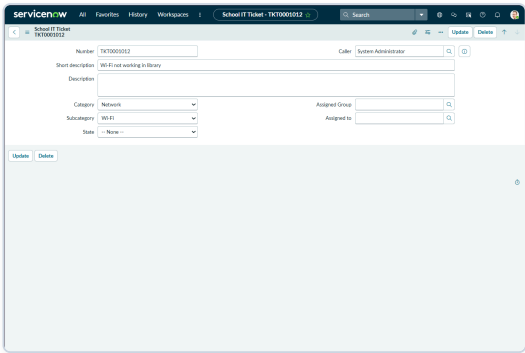

Figure 2: Automatically classified School IT Ticket.

IMPLEMENTATION EVIDENCE - NOTIFICATION ACKNOWLEDGMENT

Verification confirming requester email notification preview generated during UAT execution.

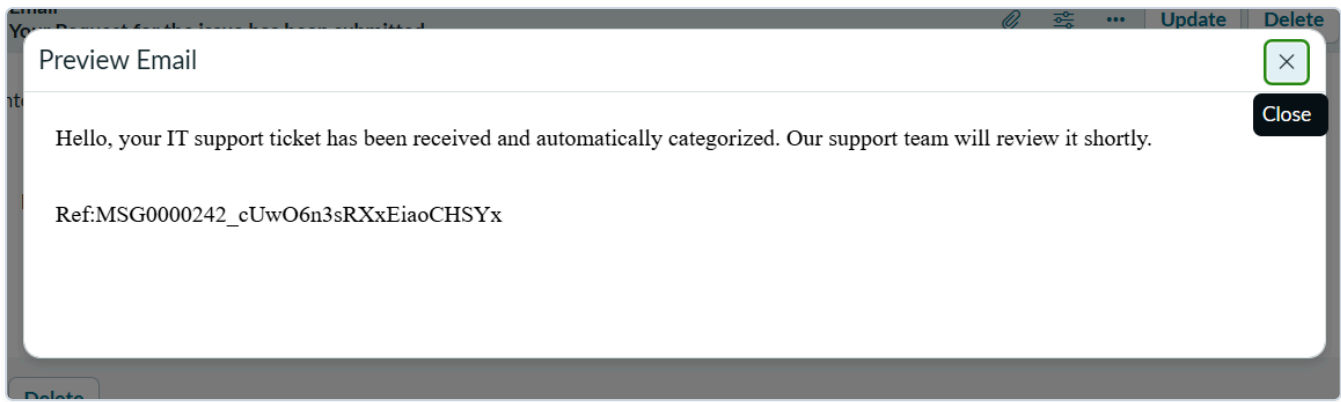

Figure 3: Requester acknowledgment email preview generated upon ticket submission.
