

PROJECT DESIGN PHASE-II

Customer Journey Map

ServiceNow School IT Helpdesk Automation

Date:28 September 2026

Team ID:NM-2026-IT-042

Project Name:Auto-Ticket Classification using Flow Designer

Maximum Marks:4 Marks

SCENARIO & PERSONA DEFINITION

Persona: A school student who encounters an IT disruption (e.g., library Wi-Fi disconnection or classroom projector failure).
Scenario: The student needs to report the issue promptly without knowing institutional IT taxonomy. The ServiceNow solution automatically categorizes the ticket and sends immediate email acknowledgment, enabling the helpdesk to resolve the incident swiftly.

CUSTOMER JOURNEY PROCESS FLOW

DETAILED CUSTOMER JOURNEY MATRIX

Stage	Typical Experience	Touchpoints	Goal / Motivation	Positive Moments	Negative Moments & Opportunity
1. Entice	Student encounters an IT glitch (Wi-Fi dropped, projector down).	Classroom, lab, library, instructor advice.	Report the issue quickly so learning is not interrupted.	Support route is recognized; direct URL available.	Neg: Unclear who to contact. Opp: Prominent portal shortcut.
2. Enter	Student accesses the ServiceNow School IT Support portal.	Next Experience UI, School IT Tickets link.	Reach an intuitive, non-intimidating submission form.	Clean form layout with Caller pre-identified.	Neg: Fear of technical terms. Opp: Remove mandatory category fields.
3. Engage	Student enters Caller name and writes brief Short Description.	School IT Ticket Form, Submit button.	Describe the issue in plain, everyday language.	Minimal fields; no confusing dropdown choices.	Neg: Uncertainty about format. Opp: Provide helpful placeholder text.
4. Exit	Flow Designer analyzes keywords and assigns categories.	ServiceNow Engine, Outbound Email.	Receive confirmation that request is received and logged.	Immediate email alert with ticket reference #.	Neg: Silence after submit. Opp: Automated acknowledgment email.
5. Extend	Technician receives pre-classified ticket in queue.	Technician workspace, resolution email.	Fast hands-on repair with zero triage bottleneck.	Ticket resolved quickly; user updated.	Neg: Triage delay. Opp: Automated category & routing.

IMPLEMENTATION EVIDENCE - FORM AND LIST RECORDS

Evidence showing the customer journey touchpoints in the implemented ServiceNow instance.

ServiceNow interface showing the 'School IT Ticket' form. The form includes fields for Number (TK10001012), Caller (System Administrator), Short description (Wi-Fi not working in library), Description, Category (Network), Subcategory (Wi-Fi), State (None), Assigned Group, and Assigned to. There are 'Update' and 'Delete' buttons at the bottom.

Figure 1: School IT Ticket form used for simplified student ticket submission.

	Number	Assigned Group	Assigned to	Caller	Category	Description	Short description	State	Subcategory
TK10001011	TK10001011	System Administrator	System Administrator	System Administrator	Hardware	Projector not turning on	Wi-Fi not working in library		
TK10001012	TK10001012	System Administrator	System Administrator	System Administrator	Hardware	Projector not turning on	Wi-Fi not working in library		
TK10001013	TK10001013	System Administrator	System Administrator	System Administrator	Hardware	Projector not turning on	Wi-Fi not working in library		
TK10001014	TK10001014	System Administrator	System Administrator	System Administrator	Network	Wi-Fi not working in library	Wi-Fi not working in library		

Figure 2: School IT Tickets list showing created records populated in the helpdesk queue.

IMPLEMENTATION EVIDENCE - EMAIL ACKNOWLEDGMENT TOUCHPOINT

The requester receives an immediate confirmation email closing the feedback loop of the customer journey.

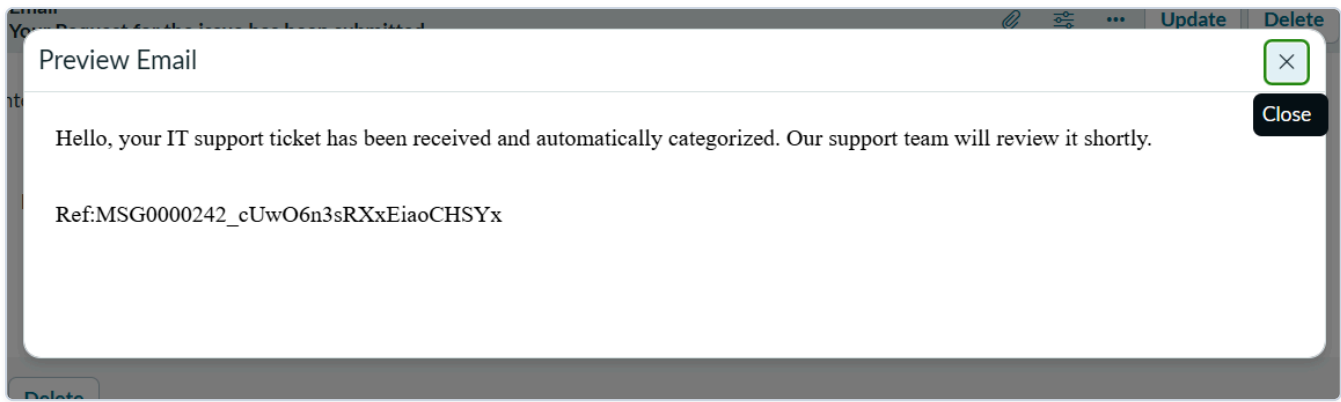

Figure 3: Email acknowledgment preview generated for the requester confirming ticket receipt and auto-classification.
