Project Name	Auto-Ticket Classification using Flow Designer
Maximum Marks	4 Marks

Problem - Solution Fit Canvas

1. CUSTOMER SEGMENT(S) Students who use the school IT helpdesk. Secondary customer: IT helpdesk technicians.	2. JOBS-TO-BE-DONE / PROBLEMS Student: report an IT issue quickly and reach the correct support process. Technician: classify and process incoming requests efficiently.
3. TRIGGERS Wi-Fi failure, projector problems, forgotten passwords, login issues, slow computers, or hanging systems trigger a support request.	4. EMOTIONS: BEFORE / AFTER Before: confusion about which category to choose, concern about submitting wrong info, frustration caused by manual triage. After: confidence that request has been classified and acknowledged, with less uncertainty.
5. AVAILABLE SOLUTIONS Manual helpdesk triage, asking a teacher or technician for help, describing the problem directly to the helpdesk, and selecting categories manually.	6. CUSTOMER CONSTRAINTS Limited technical knowledge, uncertainty about categories, need for a quick submission process, and reliance on access to the school helpdesk system.
7. BEHAVIOUR Students notice an IT problem, open School IT Tickets, enter Caller and Short Description, and submit. Technicians review resulting ticket records.	8. CHANNELS OF BEHAVIOUR 8.1 ONLINE: ServiceNow School IT Tickets interface and email. 8.2 OFFLINE: Classroom, library, laboratory or office where the issue is noticed; direct discussion with staff may occur.
9. PROBLEM ROOT CAUSE The helpdesk receives varied issue descriptions while students may not understand internal technical categories. This creates manual classification work for technicians.	10. YOUR SOLUTION A custom School IT Ticket table with Flow Designer automation. Keywords in Short Description determine Category and Subcategory, followed by an email acknowledgment.

Fit Summary: The proposed solution addresses the main problem identified for both user groups. The student provides simple information instead of making a technical classification, while the helpdesk receives a structured record that can be processed consistently.

Problem - Solution Fit - Implementation Evidence

The following screenshots are from the implemented ServiceNow project and provide supporting evidence for the fit between the identified problem and the implemented solution.

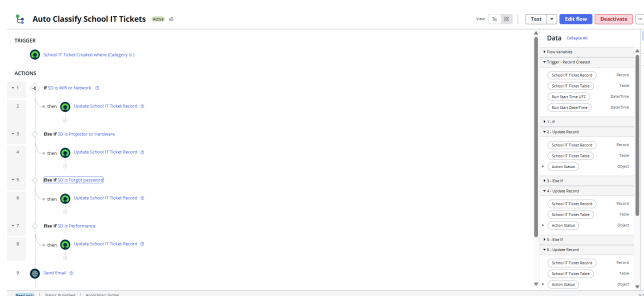

Figure 2: Published Auto Classify School IT Tickets Flow Designer workflow.

Problem - Solution Fit - Implementation Evidence (continued)

The screenshot shows the 'School IT Ticket' form in ServiceNow. The form is titled 'School IT Ticket: 1471000002'. The 'Number' field is '1471000002'. The 'Caller' field is 'System Administrator'. The 'Short Description' field is 'MS-61 not working in library'. The 'Category' field is 'Network'. The 'Assigned Group' field is 'IT'. The 'Assigned To' field is 'System Administrator'. The 'Status' field is 'Open'. The 'Updated' and 'Created' fields are visible at the bottom.

Figure 3: School IT Ticket showing the result of automatic classification.

The screenshot shows the 'School IT Tickets' list in ServiceNow. The list contains four rows of data, each representing a ticket. The columns are: Number, Assigned Group, Assigned To, Caller, Category, Description, Short Description, Status, and Subcategory.

Number	Assigned Group	Assigned To	Caller	Category	Description	Short Description	Status	Subcategory
1471000002	IT	System Administrator	System Administrator	Network	MS-61 not working in library	MS-61 not working in library	Open	
1471000001	IT	System Administrator	System Administrator	Hardware	Hardware not working in library	Hardware not working in library	Open	
1471000003	IT	System Administrator	System Administrator	Hardware	Hardware not working in library	Hardware not working in library	Open	
1471000004	IT	System Administrator	System Administrator	Network	MS-61 not working in library	MS-61 not working in library	Open	

Figure 4: School IT Tickets list showing created requests.

The screenshot shows an email acknowledgment preview. The subject is 'Preview Email'. The body text reads: 'Hello, your IT support ticket has been received and automatically categorized. Our support team will review it shortly. Ref:MSG0000242_cUwO6n3sRXxEiaoCHSYx'. There is a 'Close' button in the top right corner.

Figure 5: Email acknowledgment preview generated for the requester.
